130 YEARS OF EDOX HISTORY

CHRISTIAN RÜEFLI-FLURY

FOUNDER OF EDOX

- 1860 Born in Courrendlin (Switzerland), son of a foundry master. Educated in Courrendlin.
- 1870 Moved to Grenchen (Switzerland). Commenced horology apprenticeship with Urs Schild, one of the great Master Watchmakers, before joining the Eterna watch company.
- 1883 Married Pauline Flury. Worked for Jean Ægler - watchmaker in Biel/Bienne until 1883.
- 1884 Founded his own watchmaking atelier in Biel/Bienne. Principal founder of the Lake Biel-Bienne Steam Boat Company and originator of the Evillard funicular and the Wildermeth Hospital in Biel/Bienne. Made numerous significant donations to regional hospitals and to children's nurseries in Biel/Bienne and gave monetary support to retirement homes and sanatoriums for the hard of hearing.

1900

1920

1940

1955

1884**IT ALL BEGAN WITH
A TRUE LOVE STORY**

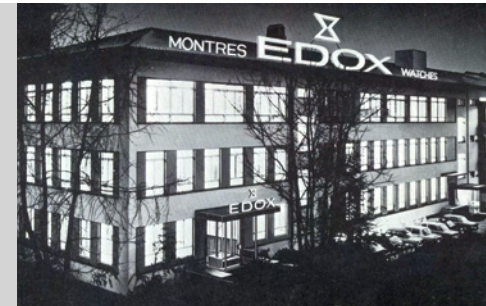

Christian Rüefli-Flury, a highly talented and romantic watchmaker “Maître-Horloger” from Grenchen in Switzerland, produces a pocket watch for the 25th birthday of his beloved wife Pauline. Impressed by this exquisite gift, she convinces her husband to set up his own watch making company in Biel, a city famous for its well-educated watch engineers. Christian Rüefli-Flury called his company “Edox” which means “measuring of time” in ancient Greek.

1900**THE BIRTH OF A LOGO**

The hourglass was officially used as a timeless symbol of Edox and since then, it has been a proud part of the official Edox company logo. In ancient Greek.

1955**A GROWING COMPANY**

At that time, Edox employed up to 500 watchmakers and the company moved into new, modern and larger production facilities. Edox was amongst Switzerland's leading watch companies.

1961
THE WATER CHAMPION

The famous “Delfin” timepiece was launched, which featured a double-case back, sturdy protective gaskets and seals, setting new standards of shock protection and water resistance.

1970
THE FIRST GENUINE
WORLD TIME WATCH

This year saw the introduction of the world’s first truly global timepiece, the “Geoscope” watch. Covering all time zones, the watch provided timekeeping for almost 50 different cities around the world, as well as local time.

1998
WORLD RECORD STILL
UNBROKEN

Edox engineers and watchmakers developed the world’s slimmest calendar watch, the “Les Bémonts Ultra Slim” collection. The movement had a thickness of only 1.4 mm, which is a technical record still held by Edox to this day.

2005
TECHNICAL ACHIEVEMENTS

Edox launched the “Les Bémonts Maître Horloger 5-Minute Repeater” timepiece, followed by the “Køenigsegg” timepiece, in a partnership between the Swedish sports car manufacturer and Edox.

**2008****CLASS-1 TIMEKEEPING**

EDOX is the official timekeeper of the Class-1 World Powerboat Championship and is the first watch manufacturer timing partner of high-class offshore races. The Class-1 timepiece collection is a true statement of the performance and a technical rendering of both philosophies.

**2010****THE TIMEKEEPER**

EDOX becomes the official WRC timekeeper and launches a new collection dedicated to rally drivers, true virtuosos of the tarmac, snow and ice, and to all devotees of the automobile and motor-racing world.

**2013****THE REVIVAL OF AN ICON**

Edox celebrates the revival of an icon with the launch of the new Delphin collection, an emblematic collection which was first launched in the 70's.

**2014****130TH ANNIVERSARY**

Since 130 years, Edox imagines, produces and distributes Swiss-made and hand-assembled timepieces. The Les Genevez based factory is operated with skilled Swiss watchmakers and modern equipment, respecting the tradition and the know-how of our elders.

RALLY INSTRUMENTS **CHRONORALLY**

All Chronorally equipment and gear must be tough enough to survive the harshest conditions: speed, mud, snow, shocks, heat, etc. Edox Chronorally timepieces have been designed and engineered to withstand the most extreme environment.

Technical materials such as strong rubber straps, solid stainless steel cases and robust, reliable movements are featured on all Chronorally timepieces. Edox is the Official Timekeeper of Rally Dakar.

SPORTING INSTRUMENTS

COLLECTION HIGHLIGHTS

Case

Robust case construction is necessary to survive the terrifying conditions of the desert.

Strap

The rubber strap of the Chronorally collections features tire prints as a strong statement.

Bezel

The steel bezels are designed to withstand all technical requirements and offer countdown functions.

SPORTING INSTRUMENTS

CLASS ONE DUBAI 2013

OFFSHORE INSTRUMENTS **CLASS-1**

"At 270 km/h, what you see in front of you is already history," Class-1 pilots say. Class-1 is the Formula 1 of the oceans. Class-1 timepieces must meet very demanding criteria and feature technical aspects such

as ceramic bezel, stated water resistance and carbon dials.

Edox is the official timekeeper of the UIM Class-1 World Powerboat Championship.

SPORTING INSTRUMENTS

COLLECTION HIGHLIGHTS

Ceramic

Ceramic is a non-metallic and anti-allergenic mineral material that undergoes treatment in a high-temperature environment. It is twice as hard as stainless steel and virtually scratch resistant.

Helium valve

The helium escape valve opens and closes automatically, allowing excess pressure to escape.

Water-resistance

Class-1 timepieces are water resistant to depths of from 900 to 3000 feet (300 to 1000 meters).

Case-back engraving

The engraving on the Class-1 provides the collection with a clear DNA. The propeller of the famous Class-1 powerboat is a distinctive emblem of this collection.

Christian Redl is one of the world's best free-diving specialists and holds a number of world records. Diving in Mexican caves or under the ice of a frozen mountain lake in the Austrian alps where the water temperature is barely 2 degrees, Christian

Redl wears the new Iceman timepiece. A perfect combination of great dial legibility, solid case materials and superb design, the new Iceman timepieces perfectly illustrate the world of silence of Christian Redl.

DIVING INSTRUMENTS

COLLECTION HIGHLIGHTS

Dial

Iceman timepieces are equipped with black carbon fibre dials.

Water resistance

A stunning water resistance to 1000 meters for the Iceman timepieces.

PVD coating

Black PVD coating enhance the technicity and robustness of the collection.

THE WATER CHAMPION WATCH **DELFIN THE ORIGINAL**

The Delfin was to be the first of many Edox models especially suited to maritime activities such as sailing, diving or power boating.

Edox set new benchmarks in 1965 with the Hydrosup, a model water-resistant to 500 metres and continued to sell Delfin models up in the 1980s.

In 2013, Edox has revived the Delfin for 21st Century watch fans, capturing the spirit of the original model with a classic retro-inspired case but also building on more than 50 years' expertise in the field of waterresistant watches.

EXTREME SAILING SERIES

SPRIT OF THE OCEAN **GRAND OCEAN**

In the world of regattas, precision, technical criteria and sportsmanship are the keys to success. The Grand Ocean collection is dedicated to the spirit of yachting and to races that push man and machine to the

limit. The timepieces reflect these sailing boats: sporty, elegant, stylish and designed for professionals. Edox is the Official Timekeeper of the Extreme Sailing Series™.

SPORTING INSTRUMENTS

COLLECTION HIGHLIGHTS

Movement

Most of the Grand Ocean timepieces are equipped with highly reliable mechanical movements.

Horns

Triple horns add a unique feature to the collection and guarantee a perfect fit of the strap.

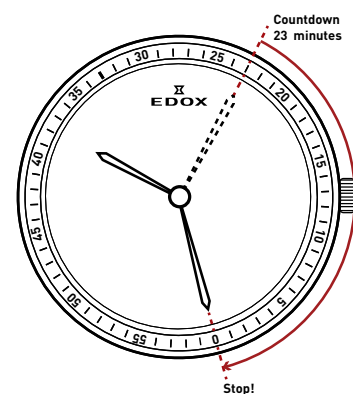

Case Construction

The Grand Ocean case structure reveals a complex, multi-part assembly.

ULTRA SLIM LES BÉMONTS

Edox is strongly linked to Les Bémonts, a small forest located near Les Genevez, and represent its heritage of the craftsmanship.

The design of the collection is timeless, classical, with pure and simple lines.

STYLE & ELEGANCE

COLLECTION HIGHLIGHTS

Movement

Les Bémonts timepieces are equipped with an excellent Swiss-made hand-winding movement.

Design

The classical yet elegant and timeless design are the most attractive assets of Les Bémonts timepieces.

Homeland

Les Bémonts is a forest near Les Genevez. Edox is very attached to its roots, values and watchmaking craftsmanship.

ULTRA SLIM
LES BÉMONTS

A TRADITION OF 325 YEARS **LES VAUBERTS**

Les Vauberts is a small area near Les Genevez, famous for having hosted the first watchmakers more than 300 years ago. Working in the fields in summer, these farmers became watchmakers during the winter

months and were the pioneers of today's watchmaking industry. The design of Les Vauberts is elegant, classic, and features reliable mechanical or powerful quartz Swiss-made movements.

STYLE & ELEGANCE

COLLECTION HIGHLIGHTS

Movement

Reliable mechanical calibers and accurate quartz movements are featured in the Les Vauberts collection.

Case

Easily recognizable thanks to its simple, elegant and classic shape.

Bracelet

Adjustable and easy to wear with elegant multiple links for the stainless steel bracelet.

Caseback

A tribute to four centuries of Swiss watchmaking history with a case-back engraving showing a historical Swiss Jura house, home of our watchmaking predecessors.

Representing a true story...

The end of the 16th century marked the start of watch making in the Jura mountains. The "Les Vauberts" collection pays tribute to this era by featuring a historic farmhouse on the case back which reflects the style of buildings where our predecessors made clocks during the harsh winter month.

THE CLASSICS **LES GENEVEZ**

What more than Les Genevez collection can illustrate Edox passion for its heritage and history? Paying tribute to its home ground,

Edox puts all nostalgia for a gone-by era in a so-called collection.

STYLE & ELEGANCE

COLLECTION HIGHLIGHTS

Movement

World record of 1.4 mm for in-house developed movement

Heritage

Edox developed the first ultra thin watch in the 50's. Les Genevez collection pays tribute to Edox heritage as specialized manufacturer of Ultra Slim timepieces.

Design

All watch cases are ultra thin (4.5 mm) and offer a water resistance of 30 meters.

EDOX QUALITY

Batteries

In compliance with global regulations and standards, Edox equips its quartz timepieces with mercury-free batteries. This is a positive step towards environmental sustainability with no effect on the watch precision and efficiency.

Conformity

Every component coming into our production facility in Les Genevez in the Swiss Jura is checked to ensure its dimensions, aesthetics, quality and interchangeability.

Diamonds

Edox diamonds are carefully selected and matched not just according to carat value but also to cut, color and clarity. All diamonds are purchased from legitimate sources not involved in funding conflict and in compliance with United Nations resolutions. We guarantee that these diamonds are conflict free.

Helium Escape Valve

Some of our Class-1 timepieces are equipped with a decompression system which allows helium to escape from inside the watch when worn for professional use in pressure chambers (long-term underwater work, crude oil exploration, etc).

The Edox helium valve opens and closes automatically. It is imperative that the models equipped with a non-automatic helium escape valve (such as older Edox timepieces) have the helium valve screwed back in order to guarantee their water resistance.

Unscrew the helium escape valve only to release the gas from the watch.

These adjustments must never be made underwater.

Leather

All Edox leather straps are specially cut, stitched and padded by expert craftspeople. Various ways of tanning provide different touch and feel for the straps made of cow or calf leather. It is always important to remember that colors and suppleness of leather are subject to change with time and exposure to external factors. Daily showers or swims are not recommended. If your consumers live a very active lifestyle, especially one involving frequent exposure to salt water and heavy perspiration, we recommend a steel bracelet or rubber strap.

Luminescence

This technology, branded under the name Super-Lumina, offers brightness in low-light conditions, thanks to a non-radioactive and non-toxic material like the tritium previously employed in the industry. Edox uses Super-Lumina for its highly functional attributes. It is applied on watch parts such as hands, numerals, bezel indices, etc.

Mother-of-pearl

Resilient, and iridescent, mother-of-pearl is integrated in many Edox dial designs. It is produced inside the shells of certain mollusk shells. This is why each dial made of mother-of-pearl is unique.

Movements

EDOX equips its timepieces with Swiss-made precision mechanical and quartz movements. These are sourced from the best manufacturers in Switzerland. Exclusive mechanisms are also developed with renowned partners for special timepieces. Edox integrates exclusive Swiss-developed and Swiss-made electronic modules to power timepieces like the Chronorally.

Mechanical movement:
A mechanical movement undergoes several stresses in its life. To ensure it will remain functional and precise as long as possible, Edox simulates watch wearing in its own quality office for every single manual and self-winding mechanism.

PVD

Edox uses PVD coatings which is a high-performance pollution-free and non-allergenic technology also used in the aeronautic industry, is widely used in watchmaking. The process involves putting a fine titanium coating on stainless steel by condensing a metal vapor in a partial vacuum.

Rubber

Edox uses genuine high-grade rubber for its straps (a natural material and extremely comfortable). The rubber is silky finished and easy to maintain with the proper cleaning.

Sapphire crystals

100% of Edox timepieces are fitted with a scratch-resistant crystal that has been cut from a polished slice of solid sapphire. Each has a triple-coated anti-reflective treatment on the internal side for better legibility.

Stainless Steel

The 316L stainless steel alloy used in Edox cases and bracelets has strong anti-magnetic properties and is optimized for toughness and corrosion resistance. It is also a good choice for consumers allergic to nickels.

Titanium

Edox integrates this metal to some of its sports timepieces, as it is as strong as steel but 45% lighter and highly resistant to corrosion. The high tensile strength to density ratio makes it the ideal material for active lifestyles.

Visual and manual testing

In addition to our testing process, all timepieces are visually checked between each manufacturing step ensuring overall quality based on our own Edox standards. If a timepiece does not pass inspection, it is checked and repaired. It can only go back to the production phase if it has passed the quality check.

XX
ATM

Water-resistance

Edox watch cases are hermetically sealed using high-grade rubber gaskets and screwed-in casebacks to ensure that no moisture or dust comes in contact with the movement inside.

WATER RESISTANCE CLASSIFICATION

	METERS	FEET	ATM	All Edox timepieces are water-resistant from 30 to 1500 metres. Check the details on the back of your Edox timepiece and read the following instructions carefully.
	30	100	3	Will withstand rain or splashes of water and accidental immersion, but should not be worn while showering, swimming or diving.
	50	165	5	Suitable for showering or swimming in shallow water.
	100	330	10	Suitable for swimming or snorkelling.
	200	650	20	Suitable for swimming or snorkelling.
	300	990	30	Suitable for scuba diving.
	500	1650	50	Appropriate for serious deep water diving.
	1000	3000	100	Appropriate for extreme deep water or bell diving.
	1500	4900	150	Appropriate for extreme deep water or bell diving.

REFERENCE NUMBER SYSTEM

The following information will help you on how to handle the Edox reference number, which will give you helpful product information regarding movements, dials and cases.

CHRONORALLY
10302 37N NIN Ø 45 MM

10302 37N NIN

MOVEMENT

The first 2 or 3 digits of these five figures represent the Edox movement code. Please refer to the page 146-151 of this catalogue.

10302 37N NIN

CASE MATERIAL

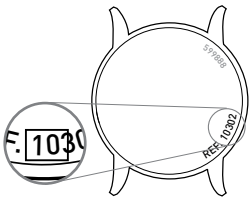

The digits and/or letters represent the material and surface treatment (colour) of the case. (See the table)

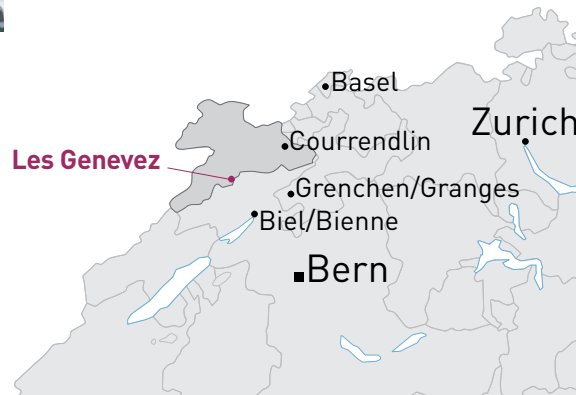

10302 37N NIN

DIAL VARIATIONS

The digits and letters represent the colour and design of the dial.

MOVEMENT
